eco-rete division of  
Semantic Srl | Benefit Corporation

**eco-rete is an**  
*independent*  
**enterprise**  
**hardware**  
**supplier**

***With us* you can  
choose freely  
which hardware  
enterprise to  
purchase**

We bring *heart*  
*and mind* to  
every enterprise  
hardware supply

# We work to create a *sustainable planet*

“ The greatest threat to our planet is the belief that someone else will save it.

**Robert Swan**

## ● **A second life**

We buy used hardware and sell it after a refurbishing process that gives it a second life.

**We support purchase and ESG departments and IT managers to buy reliable devices that work as if they were new, at a fair price, with respect towards the environment.**

## ● **The strategic spark**

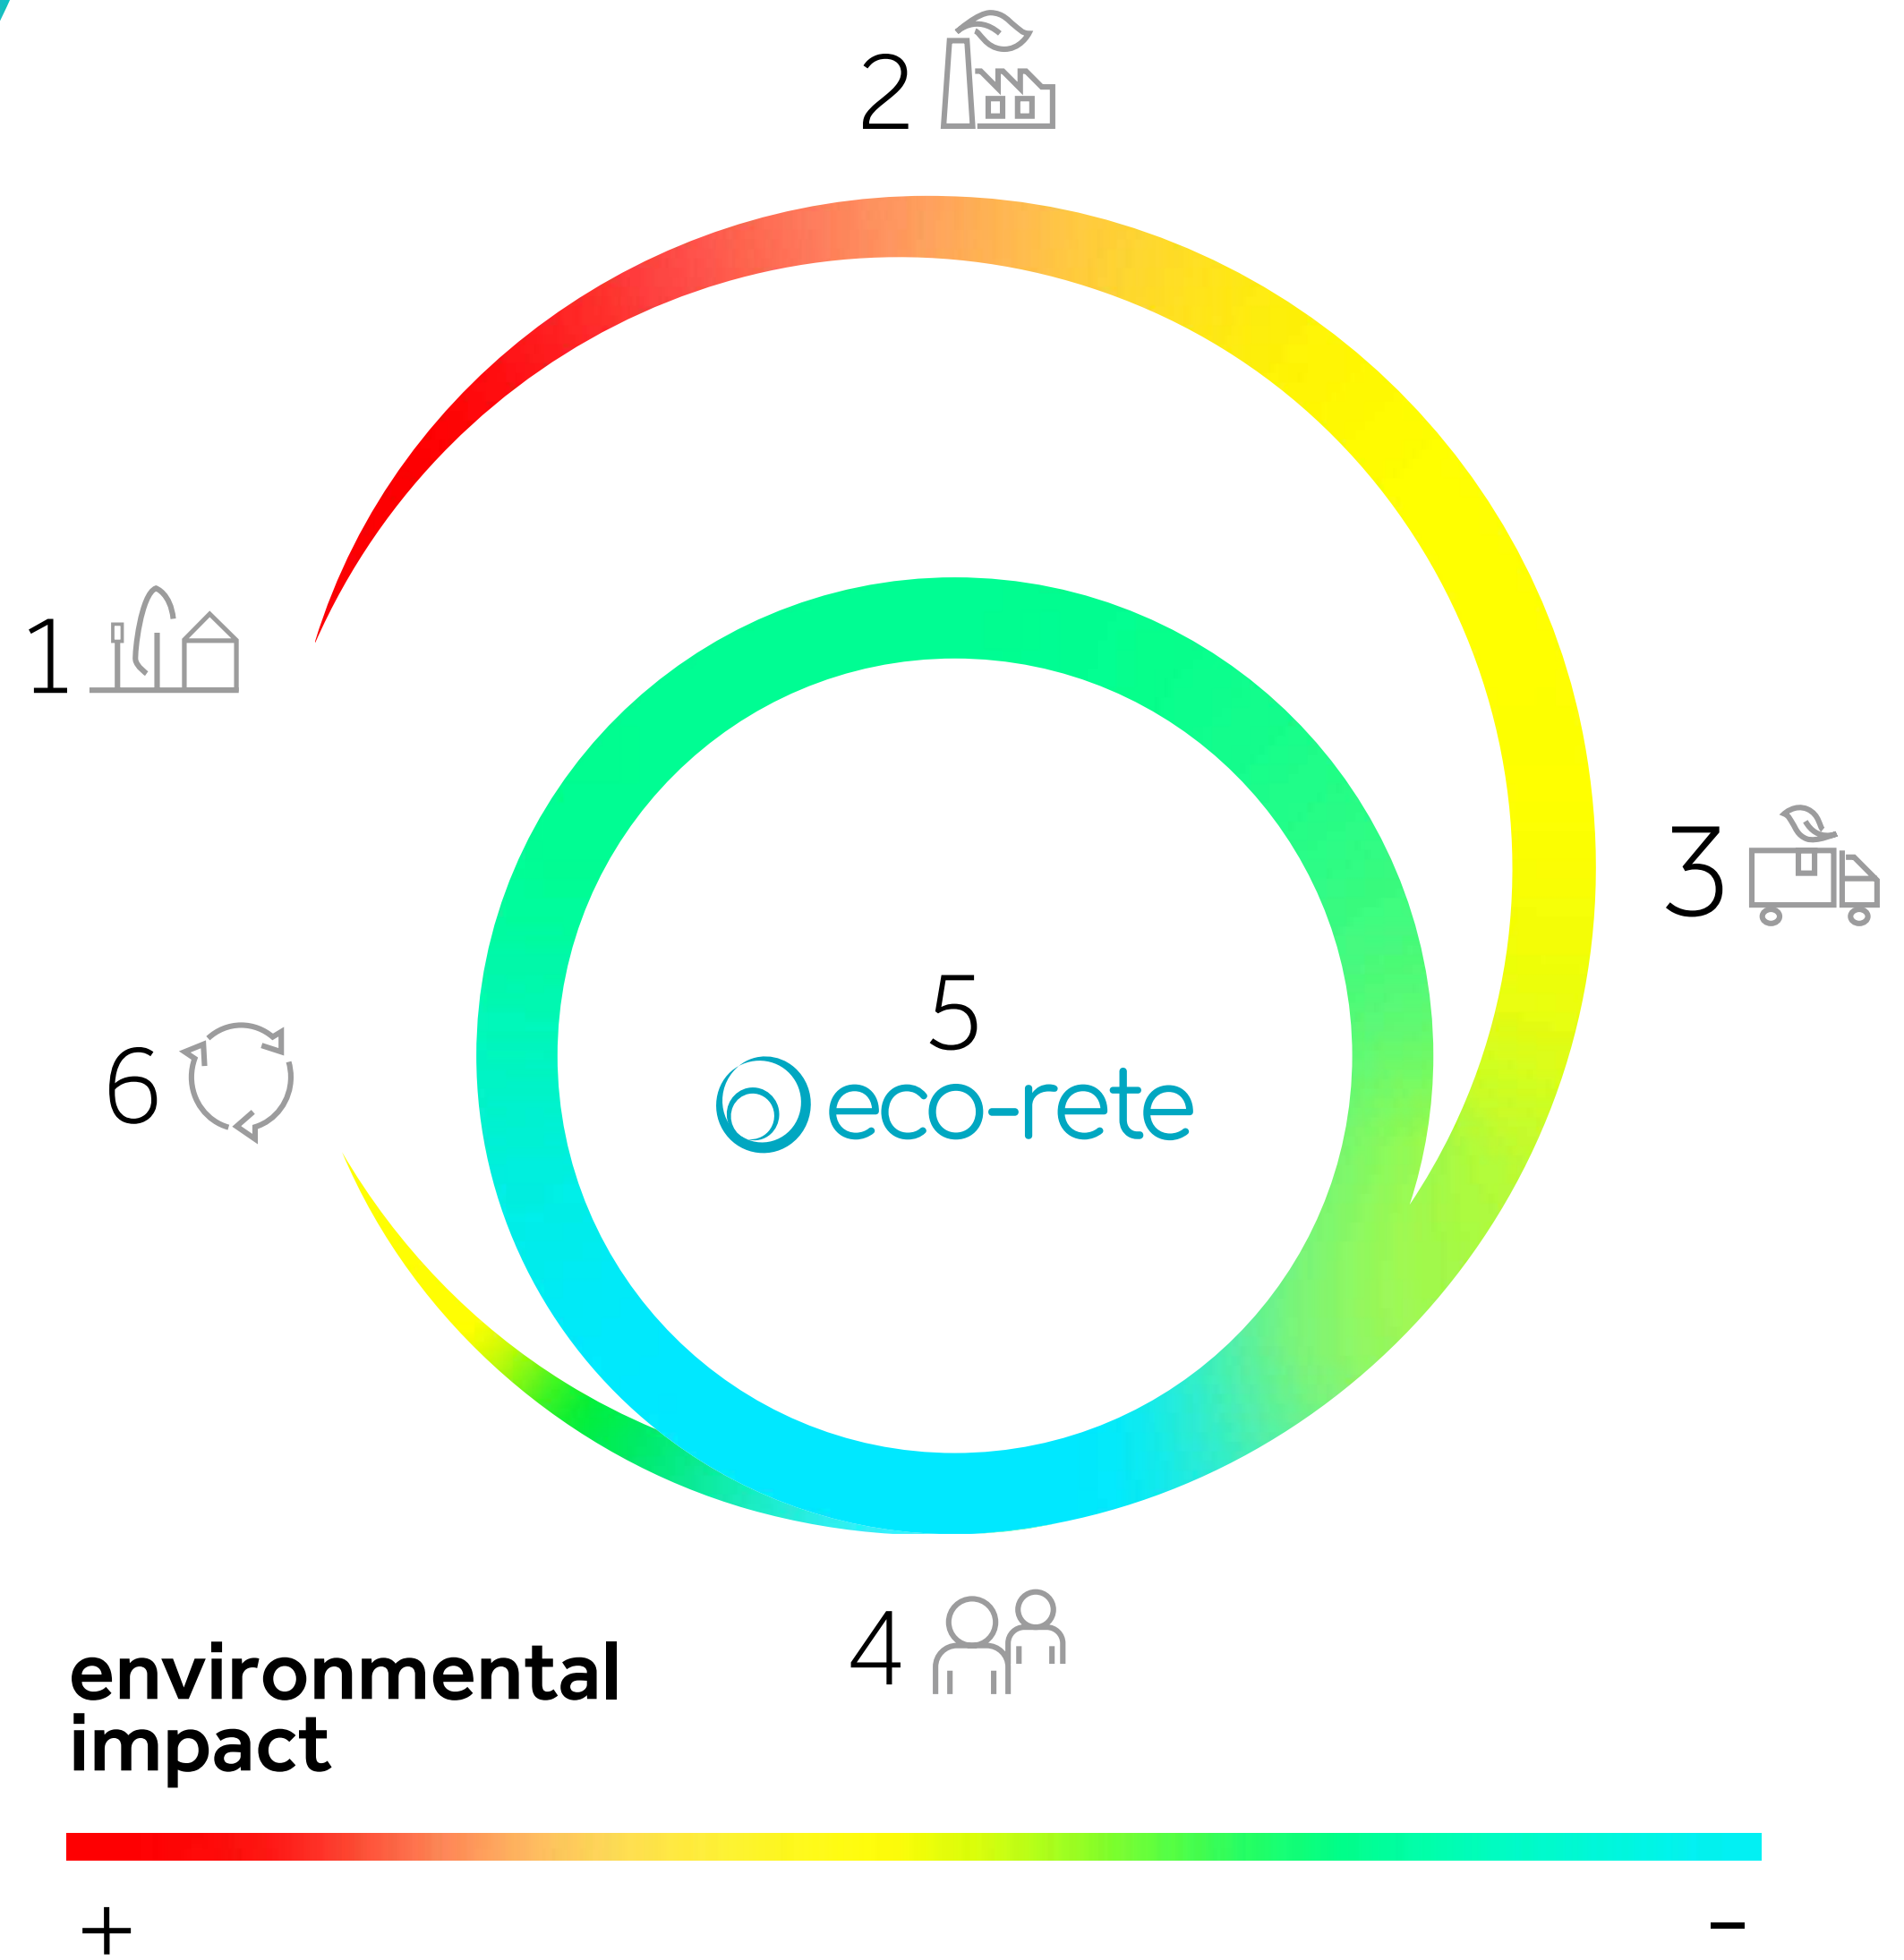

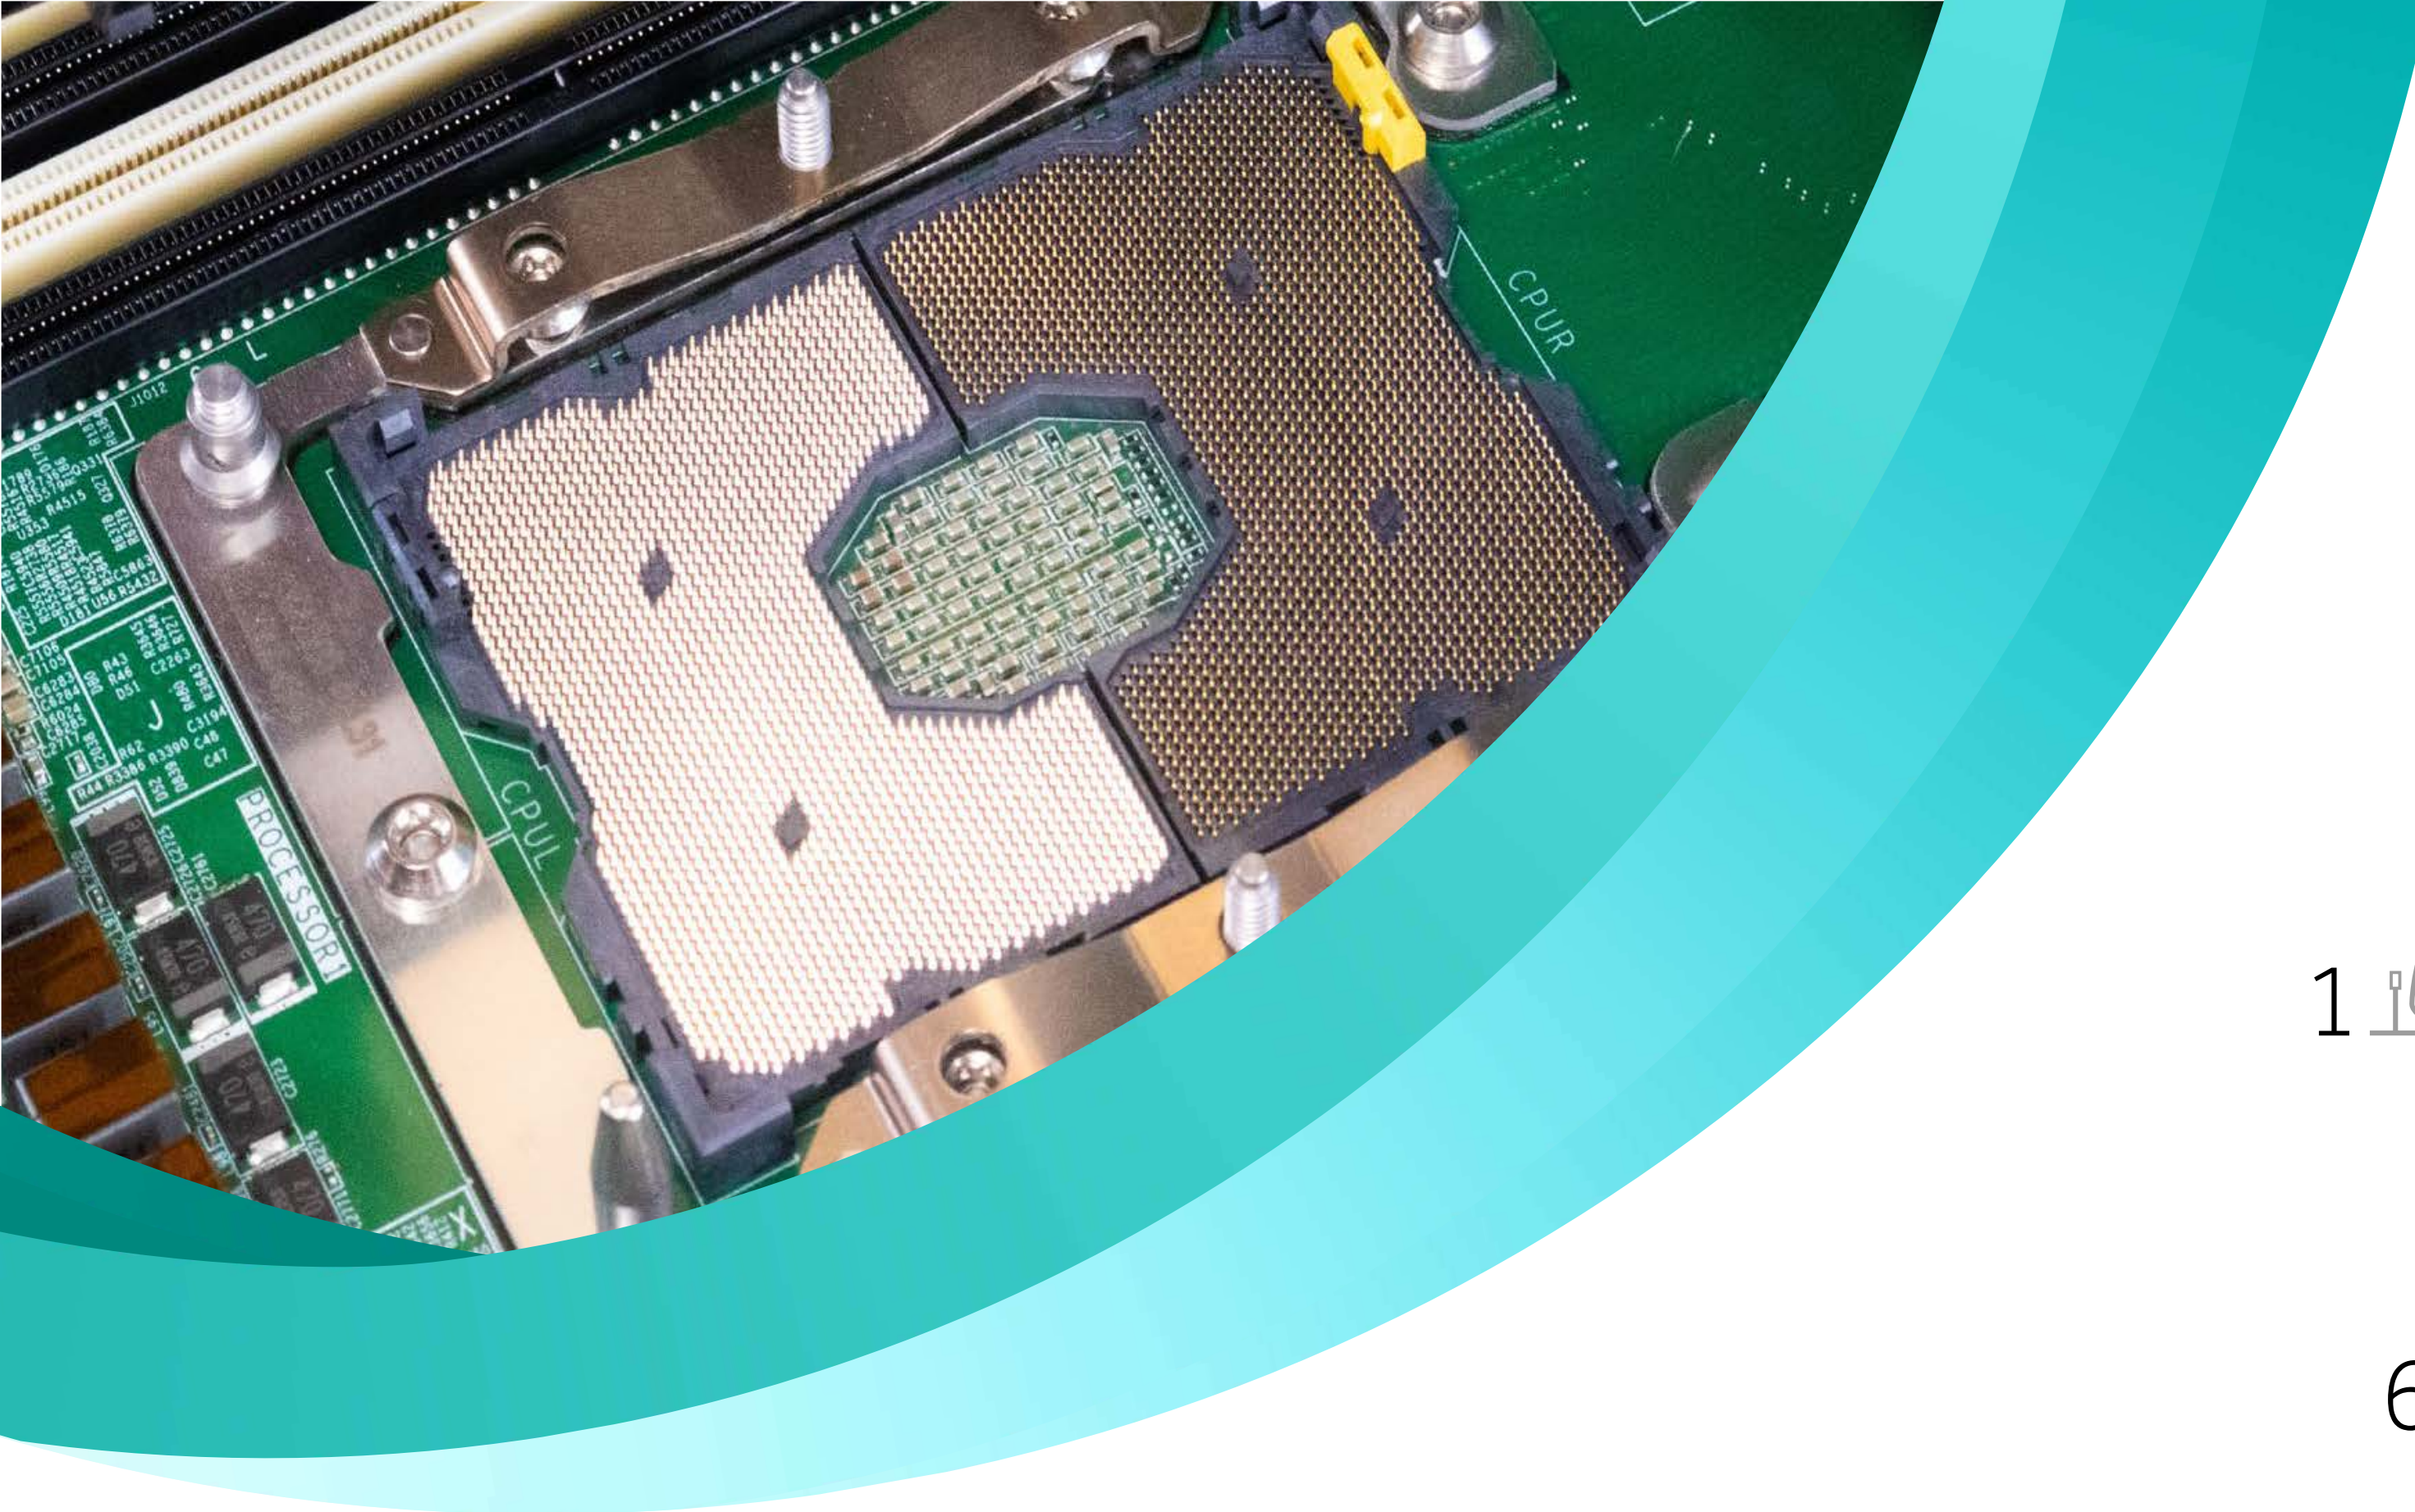

When we started, few people believed in sustainability. Words like sustainability and ethical ecology seemed not to be related to business. **Instead, we have turned them into a business that has been operating for over fifteen years.**

## ● **Innovation as identity**

We embrace change every day and **are not afraid of the unknown.**

# The path of reuse <sup>7</sup>

impact

## **Mission**

**We work for a sustainable future, based on the principles of the Circular Economy, protecting the environment and spreading the culture of refurbishing and reuse.**

## **Vision**

**We work for being the most important Italian company in the refurbished enterprise hardware sector. To remaining the main promoters of the sustainable supply chain in the Italian ICT sector. To innovating and digitalizing companies.**

## **Sustainability**

**We contribute to reducing the environmental impact of customers' IT infrastructure. Sustainability has always been integrated in our modus operandi.**

## **Consultancy as collaboration**

**We simplify, humanize, and build a relationship with the customer from the first contact to a partnership that continues over time.**
